The SyncMaster 2443BW/BWX/NW/NWX series from Samsung is an ergonomically-advanced business enhancement tool that will boost productivity, efficiency and increase satisfaction among the workforce. Built with leading edge technology and the most advanced features available today, the SyncMaster 2443BW/BWX/NW/NWX series is designed to please. To learn more, please visit www.samsung.com

Samsung LCD Monitor

SyncMaster 2443NW/2443NWX/2443BW/2443BWX

Features

Low Power Consumption

Compared to standard monitors, the SyncMaster can save up to 40-50% in power consumption while in operation mode. With our Energy Saving Function, the monitor consumes a lowly 0.3W, further reducing your overall power consumption.

Deeper, More Dynamic Imaging

Deeper dark tones and brighter light tones are achieved by the 20,000:1 Dynamic Contrast Ratio, creating lifelike images with precision and clarity. Images are displayed with an intensity that enhances both enjoyment and emotional engagement with movies, games, and pictures.

Speed that Moves You

The amazingly fast response time of 5ms produces crystal clear images—no matter how fast they are moving. So even in the fastest action sequences, images retain their purity and clarity. Blurring and trace effects are eliminated, allowing you to enjoy precise pictures at all times.

TCO'03 and Windows Vista Certified

The SyncMaster 2443BW/2443NW are both TCO'03 and Windows Vista certified. That means these monitors deliver an optimized viewing environment while being recognized as reliable, energy-efficient and environmentally-friendly. Our SyncMaster 2443BWX/2443NWX models are also Windows Vista certified and are just as powerful and deliver a high quality viewing experience.

Opening Up Your Options

For the modern office worker we have created a range of monitors which work with you and enable you to work to the very best of your ability. Sculpt the monitor to fit your ideal working environment with the fully height adjustable stand.

Image Size Function

Clear, correct images are always displayed on the widescreen due to the support of 4:3 or 5:4 image adjustment. This ensures that image distortion is eliminated and images are displayed in the correct size—even on a widescreen.

Customized Key Efficiency

Easy key customization allows you to set custom key functions for MagicBright, MagicColor, Color Effect, and Image Size for more intelligent, efficient use of your monitor.

HDCP Protection

Built with High-bandwidth Digital Content Protection (HDCP), the SyncMaster prevents the copying of digital audio and video content as it travels across connections, such as Digital Visual Interface (DVI) and High-Definition Multimedia Interface (HDMI), protecting you and your business.
